Documenting your research using NOMAD ELN functionality

Objectives

❑ Create an ELN with several entries using built-in schema.

❑ Make references between ELN entries, and define workflows.

❑ Search and filter your ELN entries.

❑ Learn the basics of creating a custom ELN.

❑ Use the tabular parser to process raw tabular data into entries.

Example Use Case: Polymer Processing

Polymer powder

Solvent

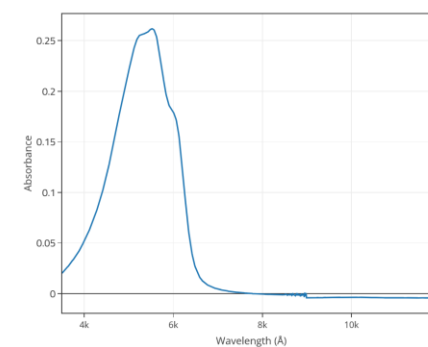

Polymer solution

Glass substrate

Polymer thin-film

Optical absorption

Scale

Ultrasonic bath

Spin coater

Optical spectrometer
